Sandesh Deshmukh

Frontend Engineer — React.js, React Native, Next.js, TypeScript

+91-9767359779 | sandeshdeshmukh2704@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Frontend Engineer with 3+ years of professional software development experience building production SaaS platforms, enterprise dashboards, ERP systems, eCommerce applications, and payment-related workflows using React.js, Next.js, TypeScript, and React Native. Experienced in complex dashboards, role-based workflows, REST API integrations, state management, asynchronous data handling, and responsive application architecture. Hands-on experience with payment integrations and React Native mobile features, with a strong focus on reliable production interfaces, reusable components, and scalable frontend architecture.

Technical Skills

Languages: TypeScript, JavaScript, SQL, HTML5, CSS3
Frontend: React.js, Next.js, React Native, Expo, Vite, Tailwind CSS, NativeWind, ShadCN UI, Material UI
Backend: Node.js, NestJS, Express.js, REST APIs, JWT Authentication, Prisma ORM
Databases: PostgreSQL, MongoDB, Supabase, Firebase
State & Data: Redux Toolkit, Zustand, TanStack Query, API Caching, Async Data Handling
Payments & FinTech: Razorpay, ICICI Payment Gateway, Payment Verification, Order & Transaction Workflows
Engineering: Git, GitHub, Postman, Figma, Performance Optimization, Responsive UI, Role-Based Access Control

Professional Experience

Frontend Engineer (React.js / Next.js) Feb 2025 – Present
Jithvar Consultancy Services *Lucknow, India*

- Built production SaaS platforms, ERP systems, eCommerce applications, and admin dashboards using React.js, Next.js, TypeScript, and Tailwind CSS.
- Developed complex multi-role dashboards with permissions, asynchronous data handling, REST API integrations, and workflow-driven interfaces.
- Implemented Redux Toolkit and TanStack Query for state management, API caching, synchronization, and frontend performance optimization.
- Integrated payment and order workflows using Razorpay and ICICI payment services, including payment verification and transaction-related flows.
- Collaborated with backend teams on NestJS, PostgreSQL, Prisma, authentication systems, and REST API architecture.
- Contributed to React Native mobile features involving API integration, product selection, checkout workflows, and asynchronous application state.
- Built reusable UI components and scalable frontend patterns across multiple product modules.
- Debugged production issues and optimized frontend performance, reliability, and responsive behavior.

MERN Stack Developer Jan 2024 – Jan 2025
Eliora Technology Pvt. Ltd. *Nagpur, India*

- Developed and maintained 5+ production web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs.
- Built authentication and role-based access workflows using JWT and reusable application architecture.
- Developed reusable React components, integrated third-party APIs, and optimized frontend performance by 15%.
- Collaborated on backend APIs, database schemas, debugging, and production deployments.

Software Engineering Intern Oct 2023 – Jan 2024
Riple Technologies Ltd. *Remote*

- Developed reusable React.js components and frontend features for MERN stack applications.
- Worked on REST API integrations, backend connectivity, debugging, and feature implementation.

Projects

QualiFlux — AI Sales Automation Platform (In Progress) 2026 – Present

qualiflux.vercel.app

- Building a multi-tenant AI-powered SaaS platform focused on CRM automation, lead management, workflow orchestration, analytics dashboards, and business automation.
- Developing reusable Next.js and TypeScript components, authentication, onboarding workflows, role-based access, API integrations, and modular application architecture.
- Designing scalable application architecture for asynchronous processing, automation workflows, and data-driven dashboards.
- Building AI-powered workflows using OpenAI, Claude, prompt engineering, structured LLM outputs, and intelligent automation.
- Leveraging Cursor, Claude, ChatGPT, and GitHub Copilot for architecture planning, implementation, debugging, documentation, and engineering productivity.

YieldVault — Solana DeFi Dashboard 2026

Live Demo | GitHub

- Built a Solana DeFi dashboard using Next.js, TypeScript, and Tailwind CSS, with interfaces for wallet connectivity, token balances, portfolio tracking, and transaction workflows.
- Designed reusable financial UI components for portfolio summaries, yield positions, token holdings, allocation charts, and transaction history.
- Developed responsive dashboard, portfolio, and transaction screens with financial data visualizations, transaction status indicators, and wallet connection states.
- Structured the application for Solana wallet adapter and RPC integration, with support for transaction workflows and future on-chain functionality.

Education

Bachelor of Engineering (Mechanical Engineering) 2018 – 2022

Rashtrasant Tukadoji Maharaj Nagpur University *Nagpur, India*

Certifications

Master in Blockchain Development – Jetking Nagpur (2022)

Topics Covered: Blockchain Architecture, Smart Contracts, Cryptocurrency Fundamentals, DeFi Concepts, Wallet Systems
